

THE CHALLENGE

Workforce training is costly, complex, and hard to scale. Traditional in-person instruction demands hands-on demonstrations, expert oversight, and access to specialized equipment—barriers that grow when learners are spread across multiple sites. Most organizations also lack the infrastructure to deliver real-time, instructor-led training remotely while still keeping learners engaged and retaining knowledge.

By The Numbers

- **70% of employees say they lack mastery of key job skills** despite large organizational spend on traditional training.⁽¹⁾
- **70% would consider leaving** their current job for one known to invest in employee development.⁽²⁾
- **68% say training and development** is a company's most important policy.⁽²⁾

THE SOLUTION

ClassroomXR enables instructors to **conduct live, AR-enhanced demonstrations that can be streamed in real-time** to remote trainees using headsets, mobile devices, or tablets. This allows subject matter experts to **train many learners at once, provide real-time feedback, and preserve hands-on learning quality**—without the cost or disruption of centralized training sessions.

THE IMPACT

90%

Boost
in entry-level task
capability

200%

ROI
with payback in under
6 months

50%

Reduction
in time to onboard
personnel
