

PRE-TRIP TRAINER

Master the Pre-Trip - Smarter, Faster, Safer

THE CHALLENGE

CDL drivers must master detailed pre-trip inspections — checking brakes, tires, lights, steering, fluids, and emergency equipment; but **traditional training often falls short**. It requires physical trucks, in-person instruction, lengthy educational sessions that often times don't stick, and offers minimal feedback and no ability to practice. **The result? Undertrained drivers, incomplete inspections, and safety violations that jeopardize compliance, and fleet readiness.**

By The Numbers

- **23% of vehicles** were placed out of service due to critical safety violations. ⁽¹⁾
- Defective service brakes are consistently the top OOS violation — **making up ~25% of all vehicle OOS violations** during inspections ⁽²⁾
- **Roughly 25% of drivers**, when pulled over for inspection, are deemed unsafe enough to be declared out-of-service. ⁽³⁾

THE SOLUTION

Pre-Trip Trainer is **reinforcing real-world inspection requirements, helping students prepare for the CDL examination, building drivers' confidence and catching mistakes** before they hit the road. **Why? The stakes are too high to leave inspections to chance.** Through our mobile experience and XR simulations, we are empowering students with step-by-step guidance in a flexible, effective learning environment. No equipment, no instructor? No problem. **Pre-Trip Trainer is taking the guesswork out of it so you can train anywhere, anytime and pass with confidence.**

What's Inside?

**Automated
Performance
Evaluation**

**Bite-Sized
Lessons for Each
Trucking System**

**Final Exam +
Downloadable
Certificate**
